

SACCR Benchmarking Community College Costs

Michelle Taylor | Senior Research Analyst
National Higher Education Benchmarking Institute

Michelle Taylor
Senior Research Analyst, National Higher
Education Benchmarking Institute

Why do you
need to
benchmark
your costs?

Price changes (1996-2016)

Selected Consumer Goods and Services

Source: BLS

Why Benchmark Program Costs?

- ▶ Gain a better understanding of costs
- ▶ Reallocation of resources
- ▶ Adjust class capacities
- ▶ Inform staffing/faculty workload decisions
- ▶ Program review
- ▶ Accreditation
- ▶ Strategic management decisions
- ▶ Accountability (Trustees, Taxpayers, Accreditors)

Sources of Benchmarks

- ▶ Two sources of national benchmarks provided by the Benchmarking Institute

Find out about the Cost and Productivity Project

The Cost and Productivity Project allows community college planners to measure and compare their instructional costs and faculty workload to those of other institutions across the country.

[Learn more](#)

Cost & Productivity Project Benchmarks

- ▶ Provides presidents, chief academic officers, deans and institutional researchers with benchmarks at the discipline level
 - ▶ Instructional costs (salaries and benefits)
 - ▶ Faculty workload
 - ▶ Class size

Cost & Productivity Project History

Summer 2002		Department of Education FIPSE project approval and grant award for “The Kansas Study”
Fall 2002 - Fall 2003		Advisory committee identified data elements, designs, processes, and conducted two pilot studies
2004	Year 1	Project implementation <ul style="list-style-type: none">• 50 institutions
2010	Year 8	<ul style="list-style-type: none">• 83 institutions
2013	Year 10	<ul style="list-style-type: none">• New website: data collection, reporting
2016	Year 13	<ul style="list-style-type: none">• Reporting most recent of 3-years of data

Cost & Productivity Project Timeline

February	Enrollment and data collection starts
June	Early bird registration closes June 1
July	Participant institutional data due on July 15; Outlier reports available
August	Verified and updated data due
September	New reports available; Peer Comparison Tool populated with most recent data

How Cost & Productivity Project Works

- ▶ Web-based data entry
- ▶ Data verification: logical errors, outlier checks
- ▶ Voluntary project: colleges provide only available data
- ▶ Confidentiality assured

Data Entry

	CIP Code ▲	CIP Title
+	27.0101	Mathematics, General.
+	27.0102	Algebra and Number Theory.
+	27.0103	Analysis and Functional Analysis.
+	27.0104	Geometry/Geometric Analysis.
+	27.0105	Topology and Foundations.
+	27.0199	Mathematics, Other.
+	27.0301	Applied Mathematics, General.
+	27.0303	Computational Mathematics.
+	27.0304	Computational and Applied Mathematics.
+	27.0305	Financial Mathematics.
+	27.0306	Mathematical Biology.
+	27.0399	Applied Mathematics, Other.
+	27.0501	Statistics, General.
+	27.0502	Mathematical Statistics and Probability.
+	27.0503	Mathematics and Statistics.

Data Entry

A. Instructional Courseload: Fall 2016

Classification	Faculty/Instructor Total Number of FTE Faculty ⓘ	Student Credit Hours ⓘ
Full-time instructional faculty ⓘ	<input type="text"/>	<input type="text"/>
Part-time instructional faculty ⓘ	<input type="text"/>	<input type="text"/>
Other full-time employees ⓘ	<input type="text"/>	<input type="text"/>

B. Cost Data: Fiscal Year ⓘ 2016-2017

1. Total student credit hours from 2016-2017 that were supported by the discipline instructional budget.

*Total student credit hours:

2. Total direct instructional expenditures for 2016-2017 (actual, after audit) ⓘ

*Are benefits included in the salary figures?:

*Are you able to compute the benefits amount?:

All Full and Part-time Faculty/Instructors ⓘ

*Salaries ⓘ: \$

*Benefits ⓘ: \$

Administrative & Support Staff ⓘ

*Salaries: \$

*Benefits: \$

Data Entry Tips

1. Results represent the cost of instruction. Data is collected at the discipline level, not at the student level.
2. Assign CIP codes to all your programs and/or courses.
3. If possible, break out to the most detailed instructional level possible. For example, break out math to algebra, statistics, geometry, etc.
4. If a faculty member crosses disciplines, proportion out faculty FTE and salary/benefits data between the disciplines that they teach.
 - a. For example, if a math faculty member teaches two algebra classes and one geometry class, proportion FTE and salary data at two-thirds to the CIP code for algebra and one-third to the CIP code for geometry.
5. For any non-faculty member who teaches, proportion out their time spent on instruction/teaching from other duties, ie. 20% of their time on teaching so 20% of their salary would be included in the discipline's cost.
6. For dean, administrators or other employees who provide instructional support across disciplines/CIP codes, proportion their workloads across the disciplines.
 - a. This could be done equally across disciplines or based on proportionally based on the # of faculty they support.
